

2 POINT PERSPECTIVE

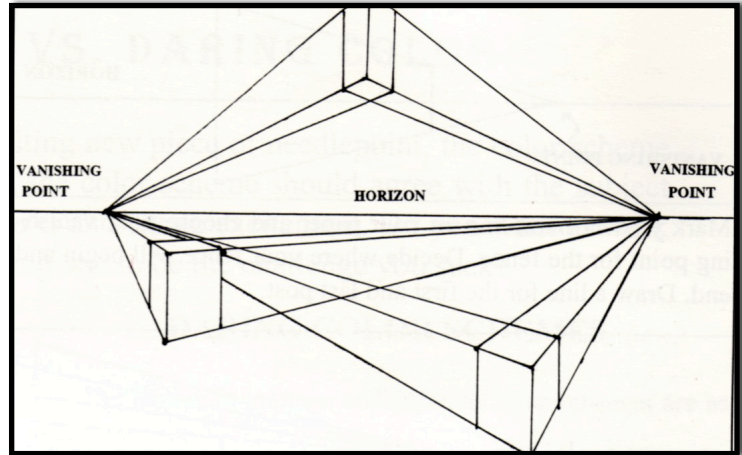

TASK:

You will create a City-Block in two Point Perspective.

Materials: Marker, Ruler, Cartridge Paper

OBJECTIVES:

- 1) Learn how to create the illusion of space through two-point perspective.
- 2) Create an interesting composition with shapes and patterns.
- 3) Experiment with the principles of balance and unity

On a large sheet of cartridge paper, students will draw lightly in pencil a city-block. Go over in marker and add patterns with repeated lines.

To avoid smudging: Place paper under your hand, and turn the ruler upside down.
