

## Fast Forwarded Family Budgeting Assignment

**BOOM! CRASH! POW!**

You have just been fast forwarded fifteen years into the future!  
You are at or near the big 3-0 (thirty years old!).

### Part A

You are responsible for creating a monthly budget for your family for the month of December, 15 years from now. *Your budget must be realistic and you must live within your means.* Respond to the following list of questions and make sure that the answers reflect **your family's** monthly income and expenses.

You will draw a card that contains the details of your family. Circle or highlight your expense choices and include any rough calculations on a separate sheet.

1. Calculate your household income. Follow the template.
2. Decide on your housing.
3. Determine your monthly utility costs. (Electricity + Water + Gas)
4. Determine your transportation costs. You may choose a car or public transit. If you have a spouse, they need transportation as well. The Affordable Bus Pass may only be selected if your total monthly income is less than \$2,000. Children ride the bus for free.
5. Determine your monthly phone, internet and cable/media expenses.
6. Determine your entertainment expenses.
7. Determine your monthly food expenses.

### Part B

Submit a reflection report of your experience. Did anything surprise you? If you had to sacrifice any wants to balance your budget, how might this impact you and your family? If your budget cannot be balanced, discuss some ways/strategies you can work towards reaching financial health. If you have money to spare, what will you do with it and why? Your reflection should not exceed one page in length, double spaced. (roughly 250 words.)
