

# AVI20 – ONE POINT PERSPECTIVE

## Draw Your City In Your Sketchbook

Remember the steps: **Step 1:** Draw a **horizon line**. **Step 2:** Draw a **vanishing point**. **Step 3:** Draw a square or rectangle. **Step 4:** Draw **orthogonals** from the corners to the **vanishing point**. Step 5: Draw horizontal and vertical lines to end the building. Step 6: Erase the orthogonals you don't need for the building. Step 7: Draw more buildings. Add windows, roads, doors, benches, lights, trees, cars, etc.

Be Creative!

# How to draw a city street in **one-point** perspective.
